Renewable Energy Systems

Chapter 1: Renewable Energy (RE) Sources

- 1.1 Introduction
- 1.2 Environmental Consequences of Fossil Fuel
- 1.3 Importance of Renewable Sources of Energy
- 1.4 Sustainable Design and Development
- 1.5 Types of RE Sources
- 1.6 Limitations of Renewable Energy
- 1.7 Present Scenario of Conventional and Renewable Energy in India

Chapter 2: Wind Energy

- 2.1 Introduction
- 2.2 Speed and Power Relations
- 2.3 Power in the Wind
- 2.4 Types of Wind Power Plants
- 2.5 Components of Wind Power Plant
- 2.6 Siting of WPPs
- 2.7 Grid Integration Issues of WPPs

Chapter 3: Solar PV and Thermal

- 3.1 Solar Radiation
- 3.2 Radiation Measurement
- 3.3 Solar Th<mark>erm</mark>al Power Plant
- 3.4 Central Receiver Power Plant
- 3.5 Solar Ponds
- 3.6 Thermal Energy Storage System with PCM
- 3.7 Solar Photovoltaic (PV) Power Systems
- 3.8 Solar PV Power Generation
- 3.9 Types of Solar Cell
- 3.10 Photovoltaic Cell Concepts
- 3.11 Energy Efficiency and Quality of a Cell
- 3.12 Series and Parallel Connections of a Solar Cell
- 3.13 Maximum Power Point Tracking
- 3.14 Applications

Chapter 4: Biomass Energy

- 4.1 Introduction
- 4.2 Biomass Resources

- 4.3 Energy from Biomass
- 4.4 Conversion Process of Biomass
- 4.5 Biomass Cogeneration
- 4.6 Environmental Benefits
- 4.7 Geothermal Energy
- 4.8 Power Generation from Geothermal Energy
- 4.9 Classifications of Water Turbine
- 4.10 Essential Components of Hydroelectric Systems
- 4.11 Classification of Hydropower Schemes

Chapter 5: Other Energy Sources

- 5.1 Tidal Energy
- 5.2 Working of Different Tidal Power Plants
- 5.3 Wave Energy
- 5.4 Energy from Waves
- 5.5 Wave Power Devices
- 5.6 Ocean Thermal Energy Conversion
- 5.7 Hydrogen Production and Storage
- 5.8 Fuel Cell
- 5.9 Principle of Working of Fuel Cell
- 5.10 Type<mark>s o</mark>f Fuel Cells
- 5.11 Energy Storage System
- 5.12 Hybr<mark>id Energy System</mark>
