

Mechatronics

Chapters

1. Introduction to Mechatronics, Sensors and Actuators

- 1.1 Introduction to Mechatronics and its Applications
- 1.2 Measurement Characteristics
- 1.3 Motion Sensors
- 1.4 Force/Pressure Sensors
- 1.5 Temperature Sensors
- 1.6 Flow Sensors
- 1.7 Color Sensors
- 1.8 Biosensors
- 1.9 Motors: Servo Motors
- 1.10 Fluid-based Actuators
- 1.11 Electrical Actuators: Linear Electrical Actuators
- 1.12 Selection of Sensors and Actuators

2. Data Acquisition and Signal Communication

- 2.1 Signal Communication
- 2.2 Introduction to DAQ
- 2.3 Types of DAQ
- 2.4 Components of a Data Acquisition System (DAQ)
- 2.5 Signal Collection in Data Acquisition Systems
- 2.6 Isolation and Filtering in Signal Conditioning
- 2.7 Amplification in Signal Conditioning
- 2.8 Sampling
- 2.9 Aliasing
- 2.10 Sample and Hold Circuit
- 2.11 Quantization
- 2.12 Analog-to-Digital Converter (4-bit Successive Approximation Register)
- 2.13 4-bit R2R type DAC
- 2.14 Data Acquisition (DAQ) in Household Applications
- 2.15 Data Acquisition (DAQ) in Digital Pressure Gauges
- 2.16 Data Acquisition (DAQ) in Digital Flow Measurement
- 2.17 Data Acquisition (DAQ) in Digital Video Broadcast (DVB)
- 2.18 Data Acquisition (DAQ) in AM/FM Broadcasting

3. Control System and Transfer Function Modelling

- 3.1 Introduction to Control System
- 3.2 Types of Control Systems
- 3.3 Concept of Transfer Function
- 3.4 Block Diagram in Control Systems
- 3.5 Applications
- 3.6 Transfer Function Modeling
- 3.7 Concept of Poles and Zeros
- 3.8 Stability Analysis using Routh Hurwitz Criterion

4. Time and Frequency Domain Analysis

- 4.1 Time Domain Analysis
- 4.2 Unit Step Response Analysis
- 4.3 Transient Specifications in Control Systems
- 4.4 Frequency Domain Analysis
- 4.5 Frequency Domain Parameters
- 4.6 Damping Frequency and Damping Factor
- 4.7 Unit Step Response of Frequency Domain Analysis
- 4.8 Introduction to Bode Plot
- 4.9 Gain Margin and Phase Margin

5. Controllers

- 5.1 Introduction to Controllers
- 5.2 Need of Control
- 5.3 Proportional (P), Integral (I), and Derivative (D) Control Actions
- 5.4 PI (Proportional-Integral) Control
- 5.5 PD (Proportional-Derivative) Control
- 5.6 PID Control
- 5.7 Parallel Form Representation of PID Controller (Numerical/Discrete Approach)
- 5.8 Tuning of PID Controllers
- 5.9 Applications of Controllers

6. Programmable Logic Controller (PLC)

- 6.1 Introduction to PLC
- 6.2 Selection of PLC
- 6.3 Ladder Logic Programming for Different Types of Logic Gates

6.4 Latching; Timers; Counters

6.5 PLC Control of Hydraulics

6.6 Mechatronic Systems Involving Timing and Counting Operation
