

IoT and It's Applications

INDEX

CHAPTER 1 – Fundamentals of IoT

- 1.1 Introduction to IoT
- 1.2 Technologies Involved in IoT Development: Internet/Web and Networking Basics, OSI Model
- 1.3 Network Access and Physical Layer: IoT Network Technologies
- 1.4 Internet Layer: IoT Network Technologies
- 1.5 Application Layer: IoT Network Technologies
- 1.6 IoT Networking Considerations and Challenges
- 1.7 The IoT World Forum (IoTWF) Standardized Architecture
- 1.8 M2M Communication
- 1.9 Architecture of IoT
- 1.10 Fog Computing and Edge Computing
- 1.11 Functional Blocks of an IoT Ecosystem
- 1.12 IoT Devices

CHAPTER 2 – IoT Access Technologies

- 2.1 Introduction
- 2.2 IEEE 802.15.4
- 2.3 ZigBee IP
- 2.4 Physical Layer of IEEE 802.15.4
- 2.5 MAC Layer in IEEE 802.15.4
- 2.6 Topology, Security and Competitive Technologies of IEEE 802.15.4
- 2.7 IEEE 802.11ah: Extending Wi-Fi for IoT
- 2.8 LoRaWAN
- 2.9 The Network Layer
- 2.10 6LoWPAN
- 2.11 IoT Application Layer Protocols

CHAPTER 3 – Design and Development

- 3.1 IoT Design Methodology
- 3.2 Embedded Computing Logic
- 3.3 System on Chips (SoCs) in IoT
- 3.4 Building Blocks of IoT
- 3.5 IoT Architecture Layers

3.6 IoT Platform

3.7 Arduino

3.8 IoT Platforms Overview: Arduino and Raspberry Pi

CHAPTER 4 – Data Analytics and Supporting Services

4.1 Introduction

4.2 Structured Versus Unstructured Data

4.3 Data in Motion Versus Data at Rest

4.4 IoT Data Analytics Challenges

4.5 Data Acquisition in IoT

4.6 Data Acquiring

4.7 Computing Using a Cloud Platform for IoT/M2M Applications and Services

4.8 Cloud Platform Services

CHAPTER 5 – Case Studies and IoT Applications

5.1 Case Study and IoT Applications

5.2 IoT Applications: Smart Homes, Smart Buildings, and Infrastructure

5.3 IoT Applications in Industries

5.4 IoT Application Requirements and Capabilities in Industrial Settings

5.5 IoT Application in Home Appliances

5.6 Industry 4.0 Concepts
