## Data Mining and Warehousing

#### Index

## 1. Data Warehousing, Business Analysis and On-Line Analytical Processing (OLAP)

- 1.1 Basic Concepts
- 1.2 Data Warehousing Components
- 1.3 Building a Data Warehouse and Database Architectures for Parallel Processing
- 1.4 Parallel DBMS Vendors and Architectures
- **1.5 Multidimensional Data Model**
- 1.6 Data Warehouse Schemes for Decision Support
- 1.7 Concept Hierarchies
- 1.8 OLAP and Characteristics of OLAP Systems
- 1.9 Typical OLAP Operations

#### 2. Introduction to Data Mining

- 2.1 In<mark>troductio</mark>n to Data <mark>Mining</mark> Systems
- 2.2 Knowledge Discovery Process
- 2.3 Data Min<mark>in</mark>g Techniques
- 2.4 Data Mining Issues
- 2.5 Data Mining Applications
- 2.6 Data Objects and Attribute Types
- 2.7 Statistical Methods in Data Mining
- 2.8 Data Preprocessing in Data Mining
- 2.9 Data Integration
- 2.10 Data Cleaning
- 2.11 Data Transformation
- 2.12 Data Reduction
- 2.13 Data Discretization
- 2.14 Data Visualization
- 2.15 Data Similarity and Dissimilarity Measures

## 3. Frequent Pattern Analysis

3.1 Mining Frequent Patterns and Associations: A Practical Scenario3.2 The Apriori Algorithm: Discovering Frequent Itemsets via Candidate Generation

3.3 Pattern-Growth Approach for Mining Frequent Itemsets

3.4 Mining Frequent Itemsets Using Vertical Data Format

3.5 Mining Frequent Itemsets Using Vertical Data Format: The ECLAT Approach

3.6 Mining Closed and Maximal Frequent Itemsets

3.7 Frequent Pattern, Association, and Correlation Rule Mining

#### 4. Classification and Prediction

4.1 Introduction to Classification and Prediction

4.2 Classification Using Decision Tree Induction

4.3 Bayesian Classification

4.4 Multilayer Feed-Forward Neural Network

4.5 Support Vector Machine (SVM) Algorithm

4.6 k-Nearest Neighbor (k-NN) Classifier

4.7 Genetic Algorithms

4.8 Fuzzy Set Approaches

4.9 Regression Analysis

4.10 Grid-Based Clustering Methods

# 5. Applications and Trends in Data Mining

5.1 Applications of Data Mining

5.2 Additional Themes in Data Mining

5.3 Social Impacts of Data Mining

5.4 Emerging Trends in Data Mining
