Engineering Mathematics

Index

Chapter 1: Differential Calculus

- 1.1 Representation of a Function
- 1.2 Limit of a Function
- 1.3 Continuity
- 1.4 Derivatives and Differentiation Rules
- **1.5 Implicit Differentiation**, Logarithmic Differentiation, and Inverse

Trigonometric Functions

Chapter 2: Function of Several Variables

- 2.1 Limits and Continuity
- 2.2 Partial Derivatives
- 2.3 Euler's Theorem on Homogeneous Functions
- 2.4 Total Derivative for Implicit Functions
- 2.5 Jacobian and Its Properties
- 2.6 Taylor's Expansion for Functions of Two Variables
- 2.7 Extreme Values of Functions of Two Variables
- 2.8 Constrained Extrema Lagrange's Multiplier Technique

Chapter 3: Integral Calculus

3.1 The Definite Integral

- 3.2 The Substitution Method
- 3.3 Integration Using the Chain Rule in Reverse
- 3.4 Integration of Rational Functions Using Partial Fractions
- 3.5 Integration of Irrational Functions
- 3.6 Integration by Parts
- 3.7 Trigonometric Integrals
- 3.8 Improper Integrals

Chapter 4: Multiple Integrals

- 4.1 Evaluation of Double Integrals
- 4.2 Change of Order of Integration
- 4.3 Double Integrals in Polar Coordinates
- 4.4 Change of Variables in Double Integrals
- 4.5 Area Enclosed by Plane Curves
- 4.6 Triple Integrals in Cartesian Coordinates
- 4.7 Volume as a Triple Integral

Chapter 5: Differential Equations

- 5.1 Introduction to Differential Equations
- 5.2 Linear Differential Equations with Constant Coefficients
- 5.3 Linear Differential Equations with Variable Coefficients
- 5.4 Method of Variation of Parameters
- 5.5 Simultaneous Linear Differential Equations with Constant Coefficients
