

# Transforms and Partial Differential Equation

## Index

### Chapter 1: Partial Differential Equations

- 1.1 Introduction
- 1.2 Formation of Partial Differential Equations
- 1.3 Solutions of a Partial Differential Equation
- 1.4 Lagrange's Linear Equation
- 1.5 Partial Differential Equations of Higher Order with Constant Coefficients
- 1.6 Non-Homogeneous Linear Equations

### Chapter 2: Fourier Series

- 2.1 Introduction
- 2.2 Periodic Functions
- 2.3 Even and Odd Functions
- 2.4 Half Range Series
- 2.5 Parseval's Theorem
- 2.6 Change of Interval
- 2.7 Harmonic Analysis
- 2.8 Complex Form of Fourier Series
- 2.9 Summary (Fourier Series)

### Chapter 3: Applications of Partial Differential Equations

- 3.1 Introduction
- 3.2 Solution of the Wave Equation
- 3.3 Solution of the Heat Equation
- 3.4 Solution of Laplace's Equation (Two Dimensional Heat Equation)

### Chapter 4: Fourier Transforms

- 4.1 Introduction
- 4.2 Integral Transforms

- 4.3 Fourier Integral Theorem
- 4.4 Fourier Transforms and its Properties
- 4.5 Convolution Theorem and Parseval's Identity
- 4.6 Fourier Sine and Cosine Transforms

## **Chapter 5: Z-Transform and Difference Equations**

- 5.1 Introduction
- 5.2 Linear Difference Equations
- 5.3 Z-Transforms and its Properties
- 5.4 Inverse Z-Transforms
- 5.5 Convolution Theorem
- 5.6 Application of Z-Transform to Difference Equations
- 5.7 Formation of Difference Equations
